

## Raptor Spotto

(birds of prey)

How many have you  
seen?

**Wedge-tailed Eagle**  
*Aquila audax*

**Little Eagle**  
*Hieraaetus morphnoides*

**Brown Goshawk**  
*Accipiter fasciatus*

**White-bellied Sea Eagle**  
*Haliaeetus leucogaster*

**Collared Sparrowhawk**  
*Accipiter cirrocephalus*

**Brown Falcon**  
*Falco berigora*

**Peregrine Falcon**  
*Falco peregrinus*

**Australian Kestrel**  
*Falco cenchroides*

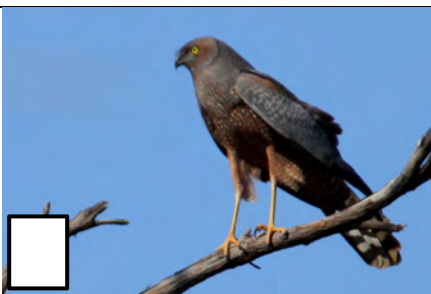

**Whistling Kite**  
*Haliastur sphenurus*

**Square-tailed Kite**  
*Lophoictinia isura*

**Black-shouldered Kite**  
*Elanus axillaris*

**Spotted Harrier**  
*Circus assimilis*

**Australian Hobby**  
*Falco longipennis*

**Information:** raptors occur in low densities & are shy, wary birds mainly active at dawn & dusk. This makes the chance of encountering them very low, but it also means any sighting at all is unique an exciting! Perched raptors are easier to identify, although less often encountered, than those in flight. Note the colour & size of the bill & feet.

## Raptor Spotto

(birds of prey)

How many have you seen?

**Wedge-tailed Eagle**  
*Aquila audax*

**Little Eagle**  
*Hieraaetus morphnoides*

**Brown Goshawk**  
*Accipiter fasciatus*

**White-bellied Sea Eagle**  
*Haliaeetus leucogaster*

**Collared Sparrowhawk**  
*Accipiter cirrocephalus*

**Brown Falcon**  
*Falco berigora*

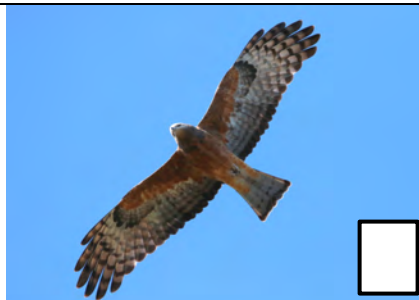

**Peregrine Falcon**  
*Falco peregrinus*

**Austrian Kestrel**  
*Falco cenchroides*

**Whistling Kite**  
*Haliastur sphenurus*

**Square-tailed Kite**  
*Lophoictinia isura*

**Black-shouldered Kite**  
*Elanus axillaris*

**Spotted Harrier**  
*Circus assimilis*

**Australian Hobby**  
*Falco longipennis*

**Information:** raptors are most often seen in flight & can be hard to identify to species. Falcons (& the kestrel) typically have pointed wings; those of kites, hawks & eagles are more rounded with larger primaries or 'fingers'. Tail size, shape & colour are useful features to take note of.
